Job Application for Analog RF IC Researcher

About Me

I have work experience in designing active power dividers/LO distribution, VCOs for different applications/frequency bands. I have also designed an active-RC low pass filter for a transmitter chain. For many of the designs I worked on, I also worked on layout of the critical blocks and using electromagnetic simulators like EMX and Momentum.

Additionally, I would like to mention that I am a non-EU citizen from Serbia, and I am prepared to navigate any necessary procedures related to work authorization.

Why imec?

I am particularly drawn to this position of researcher in imec because of challenge of trying out and exploring different circuits and topologies. I also believe my skills align well with the goals of your team.

Why Me?

My CV provides further details on my professional journey, showcasing projects where I implemented innovative solutions and improved design efficiency.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and skills can benefit your company.

Sincerely,

Aleksandar N. Vuković
